

***Project #6 – Upper Arkansas River Rehabilitation Study***

**Location:** Upper Arkansas River Corridor

**Agency:** KWO (USACE)

**Description:** Determine opportunities for stream rehabilitation that improve streamflow conveyance, minimize river water quality impacts to ground water, reduce obstruction and water consumption by phreatophytes and reduce potential flooding problems. This effort would initiate and complete a reconnaissance study and initiate a feasibility study. Federal funding for this project passed in the Senate version of the FFY06 Energy and Water Appropriations Bill. Feasibility studies require a 50/50 cost share.
