

Brad Loveless

Brad Loveless was raised in Ohio and received a B.S. in Zoology from Ohio State University and an M.S. in Biology from University of Kansas. He worked for Westar Energy for 31 years, the first 12 years being at Wolf Creek Nuclear Station.

Since then, he has worked in Topeka and been focused on avoidance of environmental impacts through proper design and siting of electrical generation and distribution facilities, and mitigation of those impacts, when they occur. Loveless helps plan company actions to achieve proactive regulatory compliance, worker protection and to lead the Green Team, a volunteer group of employees and retirees that have been helping with habitat improvement, environmental access and education, and enhancement of sensitive species for nearly 30 years.

In 2009, he was recognized by the Kansas Wildlife Federation as Wildlife Conservationist of the Year and by the Kansas Association of Conservation and Environmental Education as their Strickler Award winner for Environmental Education. In 2013 Loveless also received the State Forester Award from the Kansas Forest Service.

He is married to Mindy, has three boys, and enjoys working on church initiatives, fishing, hunting, beekeeping and gardening.
